Double Fork - C

```
int main(void)
{
    int id;

    id = fork();
    if (id == 0)
        printf("born to zeubi child id [%d]\n",
id);
    else
        printf("born to zeubi parent id [%d]\n",
id);
}
>>>
born to zeubi parent id [57894]
born to zeubi child id [0]
```
